ASSISTIVE AIRPORT

Reach a wider audience with audio direct to their own device.
No more discrimination only compliancy.

A close-up photograph of a person's hands holding a yellow smartphone. The background is blurred, showing what appears to be an airport or travel setting with other people and lights.

SMART PHONE / HEADPHONES

Keep passengers informed with the latest airport/flight information, whilst conserving a peaceful atmosphere.
Send all/select announcements directly to the users smart device and bluetooth headphones;

A close-up photograph of a hearing aid device, specifically a cochlear implant, attached to a person's ear. The device is small and metallic, with a coiled wire extending from it.

HEARING AIDS / COCHLEAR IMPLANTS

Travelling can be a stressfull, confusing experience for anyone. Ensure disabilities are catered for by having announcements previously unable to be understood, transmitted directly to the passengers Hearing aid devices.

A photograph showing the lower legs and feet of a person walking on a light-colored floor. They are wearing dark trousers and black shoes. A white cane with a red tip is visible, extending from the person's hand down to the floor.

VISUAL IMPAIRMENT

Announcements are sent directly to the passenger in Audio and Text format. With over 64 Languages to choose from, PA Anywhere does not discriminate. Enhanced by smart features such as: Magnification, Select to speak, Talk back and notification updates.

We are headquartered in the UK with customers on every continent.

Many of the world's most successful organisations rely on our equipment including; major hub airports, railway networks, museums, libraries, traffic control centres, ports, ferries, military sites and power stations.

Phonetica is one of our 'out of the box' solutions that can be easily configured to your needs. We also offer a personal, tailored consultancy service to help you solve individual problems whether you're upgrading or building a new airport or moving to 'a silent operation'.
